

CRYPTO GUARDIANS

Russian Peoples Coin

Prepared for The People

INTRODUCTION:

My name is Raymond Dew, (The Doctor),

I Am The soon to be CEO of Crypto Guardians and the creator of this Token.

We will be officially Incorporating ASAP within 8-12 months

My Business Partner and 40% owner of this company Is: Dylan Clarke

We live in 1 / 4 Tabrett street, West Kempsey, NSW 2440, Australia. We both Have Asperger's and care about all people no matter where they are from and the future of this planet.

I made this Token to help provide relief For the Russian People and to Fund our business ventures which we will always give at least 30% of everything We earn to help others,

My Facebook page is <https://www.facebook.com/iiiithedoctorlll/>

I have a part of my ID and my whole Home Address On There :) this is as trustworthy as it gets, visit my website to read more and hopefully, we can help heal the world a bit together, will be launching a Ukraine Token very soon.

The Token

- I have seen suffering in this world that I can no longer Ignore, us as well, having autism and severe anxiety, We must act now
- 30% of everything we ever earn will go to helping others
- We are extremely dedicated to this goal
- I (Raymond Dew) have incredible skills in Cryptocurrency and anything Technology related
- We will only ever keep 10% of the Tokens Holdings and 20% of those will be used For Charitable causes

The Token on BSC Blockchain

This Token is designed to help innocent Russian Civilians transfer their native currency the Russian Ruble or any other currency into RPC on the BSC blockchain.

This Token (RPC) is for a very good cause, people are people and Russian lives are just as valuable as anyone's, they do not deserve to starve.

The Bit Times Token Info:

<https://thebittimes.com/token-RPC-BSC-0xb14bbbed01f261ca785d2d41c9a5c6a05cc54744.html>

It's Now Available <https://pancakeswap.finance/swap> to trade select BNB then click the trading pair and paste the contract address and add the token then you can buy some.

The contract address is : 0xB14bbBeD01F261CA785d2D41C9a5C6A05Cc54744

Or you can purchase RPC directly from me, message me:

<https://www.facebook.com/iiithedoctorIII/>

contact me and I can send the desired amount of RPC to your wallet from my personal holdings for the current market price plus If you need help I can guide you to get everything set up for a small fee, Only \$40 USD + The Token Price

There are 100,000,000 of them minted which is a very small number compared to most tokens so the value I estimate will be very high,

Shiba INU is now \$0.00002 USD and it has 1 quadrillion minted,

if they get adopted even 1/100th as well as Shiba INU each Token will be \$2 USD, SHIBA INU Did not have an idea like this behind it. I'm currently selling them for \$0.012 USD or \$0.016 AUD per RPC. Current Market Cap is \$1,249,250.498 USD

I Have renounced ownership, what that means is that I won't have access to change anything to hurt the The Token or your investment as many horrible people do to their customers, There is no way for this to be rugpulled.

30% of our profit from all of our business ventures will go toward charitable causes all over the world.

We believe with sound calculation our Token Will reach the value of between \$0.50-\$1.00 per token by 2023 and up to \$1000 per token within 10 years.

I want to be completely transparent so much so that I have supplied all my personal details that can be verified but please respect my privacy and honesty, let's help the world together :)

So to The MOON...
