I Am The soon to be CEO of Interplanetary Financial and the creator of this Token.

We will be officially Incorporating ASAP within 7-11 months

My Business Partner and 40% owner of this company Is: Dylan Clarke

We live in 1 / 4 Tabrett street, West Kempsey, NSW 2440, Australia. We both Have Asperger's and care about all people no matter where they are from and the future of this planet.

I made this Token to help provide relief For the Ukrainian People and to Fund our business ventures which we will always give at least 30% of everything We earn to help others,

My Facebook page is <https://www.facebook.com/iiiithedoctorlll/>

I have a part of my ID and my whole Home Address On There :) this is as trustworthy as it gets, visit my website to read more and hopefully, we can help heal the world a bit together,

will be launching a Native American Token very soon.

The Token

- I have seen suffering in this world that I can no longer Ignore, us as well, having autism and severe anxiety, We must act now
- 30% of everything we ever earn will go to helping others
- We are extremely dedicated to this goal
- I (Raymond Dew) have incredible skills in Cryptocurrency and anything Technology related
- We will only ever keep 10% of the Tokens Holdings and 20% of those will be used For Charitable causes

The Token on BSC Blockchain

This Token is designed to help Ukrainian Civilians get through these tragic and unprecedented times, most people on earth do not know suffering such as this in Ukraine, this unprovoked and brutal attack is a disgrace and I will give 30% of this coin to charity, at least 20% of it directly to Ukraine.

20% of my Personal holdings will also be donated to charities which half of that 20% will be given out to Ukrainian people, just contact me :)

This Token (UPC) is for a very good cause, This war must end.

Or you can purchase UPC directly from me, message me:

<https://www.facebook.com/iiithedoctorlll/>

contact me and I can send the desired amount of UPC to your wallet from my personal holdings for the current market price plus if you need help I can guide you to get everything set up for a small fee, Only \$40 USD + The Token Price

There are 100,000,000 of them minted which is a very small number compared to most tokens so the value I estimate will be very high,

Shiba INU is now \$0.00002 USD and it has 1 quadrillion minted,

if they get adopted even 1/100th as well as Shiba INU each Token will be \$2 USD, SHIBA INU Did not have an idea like this behind it. I'm currently selling them for \$0.000636501096 USD or \$0.00085 AUD per UPC. Current Market Cap is \$61,150 USD

I Have renounced ownership, and have locked some liquidity I'll be locking as much as I can each week, what that means is that I won't have access to change anything to hurt the Token or your investment as many horrible people do to their customers, There is no way for this to be rugpulled, we are also locking liquidity for our other submission to coinmarketcap RPC.

30% of our profit from all of our business ventures will go toward charitable causes all over the world.

We believe with sound calculation our Token Will reach the value of between \$0.10-\$0.40 per token by 2023 and up to \$200 per token within 10 years.

I want to be completely transparent so much so that I have supplied all my personal details that can be verified but please respect my privacy and honesty, let's help the world together :)

So to The MOON...
